### **DETAILED ACTION**

1. This Office action is response to Applicants' AMENMENT filed on 09/04/2007.
2. Claims 1-22 are allowed.

### **Allowable Subject Matter**

3. The present application has been thoroughly reviewed. Upon searching a variety of databases, the examiner respectfully submits that claims 1-20 are allowed in light of the applicants' argument and in light of the prior arts of made record.

The following is an examiner's statement of reasons for allowance:

4. The claimed invention is directed to methods for adding HTML documents to a web site involves the addition of HTML keywords to each HTML document. One HTML keyword is provided per category of information. A search for each category of information is determined, and the searches are to be performed by a search engine. When a category on the web site is selected, a search engine is called to execute the search corresponding to the selected category of information. The search is not visible to a user of the web site. An up-to-date web page is presented for the selected category of information. The up-to-date web page includes a hypertext reference having a link to each pertinent HTML document this is identified by the search.

The closest prior arts, Pub. No.: US 2004/0215664 A1 of Hennings et al. (hereinafter Hennings) teaches contextual information concerning linked documents. The contextual information or HTML content or document is stored in a web server HTML. A web page or HTML document includes at least one category, keyword or link

Art Unit: 2162

to another HTML document to be called or invoked by clicking on the link or hyperlink and search of all HTML documents on a web site. And US Patent No.: US 6,304,886 B1 issued to Bernardo et al. (hereinafter Bernardo) teaches the creation of a web site that requires a plurality of pre-stored templates comprising HTML formatting code, text, fields and formulas for use in simplifying the creation of web sites. Combination of Henning and Bernardo fail to teach searching/accessing the HTML documents that have been uploaded or setup to the directory containing at least one searchable HTML document and HTML document is automatically available for reading without creating specific web pages to access the HTML documents and without using a database.

These distinct features, in conjunction with all other limitations of the dependents and independent claims render claims 1-22 them allowable.

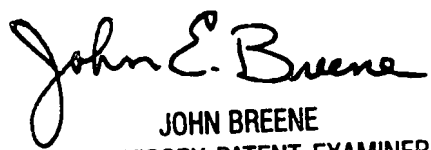

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
